

Public Health Community Board Profile 2020 – Wing and Ivinghoe

Why are communities important for our health?

The community we live in is one of the most important factors for our health. We thrive in communities with strong social ties, a feeling of togetherness and a sense of belonging. Our local social, economic and physical environment can affect our health directly, the health behaviours we adopt such as being physically active, and sometimes whether we access health and care services. The local environment we live in is vitally important throughout the whole of our life course, from *before* we are born right up until the end of our lives.

The indicators included in this Community Board Profile are all important markers of the health and wellbeing of your community, and highlight areas where things are going well but also importantly where improvements can be made. Strong communities will be a key driver for recovery from the impact of the COVID-19 pandemic.

Please note that this profile is a high level overview of health and wellbeing indicators from existing data. Communities will have more intelligence on local issues and assets which can be incorporated into the full picture of local needs and how they can best be met.

The people in your community

It is important to understand who lives in your community to understand their health and wellbeing. Factors such as age, ethnicity and level of deprivation influence our physical and mental health. Understanding these factors may help decide which interventions may be needed to improve the overall health and wellbeing of the community.

Wing and Ivinghoe community board:

- Has a population size of **23,761**
- Has a **greater proportion of adults aged 40 to 65** compared with the County overall (37.2% vs 34.0%), with 6.1% of the population < 5 years old (County average = 6.0%) and 17.4% > 65 years old (County average = 18.7%)
- Has **a less ethnically diverse population** compared to the County overall – Black, Asian and Minority Ethnic (BAME) population = 5.4%, compared with 13.6% in the County
- Has **a lower score on the national Index of Multiple Deprivation measure¹** than the County overall (a higher score indicates a greater level of deprivation based on a range of aggregated indicators)
- Has a **similar life expectancy for both men and women** compared with the County average (but higher than the England average for both)

¹ The Index of Multiple Deprivation (IMD) is The Government's official measure of relative deprivation in small areas in England called lower-layer super output areas. IMD includes seven domains to provide an overall measure. The domains are: income deprivation; employment deprivation; education, skills and training deprivation; health deprivation and disability; crime; barriers to housing and services; and living environment deprivation.

Natural & built environment in your community

Being in contact with the natural environment is vital for our mental wellbeing and physical health at all ages. Air pollution contributes to a range of poor health outcomes including low birth weight babies, stroke, dementia, lung disease and heart disease. The environment affects our mental health and ability to adopt healthy behaviours such as being physically active.

Wing and Ivinghoe community board:

- Has a **lower proportion of green space coverage** compared with the South East average (2.2% vs 3.2%)
- Has a **similar level of air pollution** is compared with the South East average

Growing up in your community

What happens in pregnancy and early childhood impacts on physical and mental health all the way to adulthood. Important factors in the early years include being born at a healthy birth weight, growing up in a household with sufficient income, receiving a good education and adopting healthy behaviours from childhood.

Wing and Ivinghoe community board:

- Has the **6th lowest number of live births** in the County
- Has a **lower proportion of low birth weight babies** (5.9%) compared with the County average (7%)
- Has a **lower proportion of children living in income deprived households or poverty** (8.9%) compared with the County average (12.1%)
- Has a **higher proportion of 'School Ready' children** (79.3%) compared with the County average (74.2%)
- Has a **higher proportion of overweight or obese Year 6 children** (32.1%) compared with the County average (29.4%)

Health behaviours in your community

The four main health behaviours – smoking, physical inactivity, unhealthy diet and alcohol misuse - account for 40% of all years lived with ill health and disability. Addressing these four behaviours could lead to a reduction by up to 80% in new cases of heart disease, stroke and type 2 diabetes and a reduction of 40% in new cases of cancer. It has been shown that obesity in adults is a risk factor for worse outcomes following infection with coronavirus (COVID-19) as well as other poor health outcomes.

Wing and Ivinghoe community board:

- Has a **lower smoking prevalence** (13.3%) than the County average (14.6%)
- Has a **higher proportion of physically inactive adults** (18.4%) compared with the County average (16.5%)
- Has a **higher proportion of obese adults** (34.4%) compared with the County average (31.4%).
- Has a **lower rate of residents receiving treatment for alcohol and non-opiate misuse** (96.3/100,000) than the County overall (128.5/100,000)

Long term conditions and healthcare usage in your community

Long term conditions such as diabetes not only cause significant amounts of poor health to individuals but they also lead to higher use of health care and social care. These conditions are often preventable by adopting healthy behaviours as above, but also through dedicated prevention strategies such as the NHS Health Checks programme. People with some long term conditions like diabetes and heart disease appear to be at higher risk of poorer outcomes following infection with coronavirus (COVID-19).

Wing and Ivinghoe community board:

- Ranks **amongst highest** for proportion of adults with depression, high blood pressure and dementia, and ranks **in the mid-range** for adults with diabetes, cancer and mental health illnesses compared with the other Community Boards
- Ranks **5th highest for emergency admissions to hospital overall, for both adults and children** compared with the other Community Boards
- Has a **higher rate of uptake of NHS Health Checks** (45.0%) compared with the County average (43.8%)

Vulnerable groups in your community

Individuals in certain vulnerable groups (e.g. those who are socially isolated, unemployed or living on low incomes) experience worse mental and physical health outcomes compared with the general population. People who experience social isolation and loneliness are more likely to experience depression and anxiety, be physically inactive, smoke and drink alcohol and have an increased risk of heart disease and dementia and die prematurely.

Wing and Ivinghoe community board:

- Has a **similar proportion (2.1%) of unemployment benefit claimants** to the County average (2.9%)
- Has **3,206 (13.8%) residents living in households at higher risk of food poverty** – 4.0% of the County total
- Has a **lower rate of domestic abuse related incidents and crime** than the County average
- Has the **same personal debt per person** amount (£786) to the County average (£787)
- Has areas with some people at **risk of loneliness (65+ years)**
- Has a **lower proportion of residents seeking support from the Citizens Advice Bureau** compared with the County average, although this proportion has increased after the COVID-19 lockdown (most frequent issue advice was requested for **before lockdown was benefits and tax credits**, and **after lockdown was employment**)

The impact of COVID-19 in your community

COVID-19 has undoubtedly had an impact across Buckinghamshire. The pandemic has brought out the best in many communities in terms of community spirit and volunteering efforts. However, COVID-19 has also affected groups in the community in terms of unemployment, debt, food poverty and mental health.

Wing and Ivinghoe community board, as of 26th May 2020:

- There were **767 residents shielding** – 4.3% of County total
- There were **115 residents receiving government food deliveries** – 4.0% of the County total
- There were **30 residents requesting essential supplies** – 3.6% of the County total

- There were **138 residents requesting help with basic care** – 3.7% of the County total

Recommendations based on this public health profile

1. Wing and Ivinghoe has a higher proportion of overweight and obese children and a higher proportion of physically inactive adults therefore, reducing childhood **obesity** and **physical inactivity** are key areas for your community as they are major causes of preventable ill health and death. The Council's Live Well Stay Well service can support your community to stop smoking, lose weight and get active. Anyone can self-refer themselves to this service.
2. Wing and Ivinghoe has a much higher proportion of working age adults and ranks **amongst the highest for proportion of adults with depression and high blood pressure**, therefore promoting healthy ageing through healthy lifestyles should be a priority for your community. For example promote and encourage physical activity amongst middle-aged people; the evidence shows physical activity reduces the risk of depression, high blood pressure and dementia later in life.
3. This community has a **higher proportion of residents with dementia**. Additional dementia-friendly initiatives should be explored; these could help to ensure people get support before it becomes an emergency. Other interventions that should be considered are ones that promote healthy ageing.
4. Wing and Ivinghoe has a **higher rate of uptake of NHS Health Checks** compared to Buckinghamshire but still less than 50% of those eligible. This programme addresses the risk factors of heart disease and kidney disease. Promoting the NHS Health check is strongly encouraged.
5. To reduce impact **COVID-19** in Wing and Ivinghoe, as part of the local recovery plan, initiatives to improve mental health and wellbeing are important to consider. Initiatives that support resilience, employment and community cohesion are worth considering as part of the recovery.

Notes

¹ Obesity data is calculated as a % of those with a BMI recorded. The number of patients with a recorded BMI will vary across practices and therefore the figures presented in this profile are to be used as an indication only.

² Data available for all persons registered with a Buckinghamshire CCG practice. Data not available for Buckinghamshire county residents who are registered with a non-Bucks practice (approximately 5% of population).

³ Figure is likely to be an underestimate as missing postcode data for around 1,000 residents in Buckinghamshire on that daily download.

⁴ Food poverty risk calculated based on household composition and benefits claims, calculated by University of Southampton.

⁵ Local Insight data is based on modelled estimates

The impact of COVID-19 on communities in Buckinghamshire

COVID-19 has been shown to have a differential impact on communities. Factors such as **older age, male sex**, being from a **Black, Asian or Minority Ethnicity (BAME) group**, **residing in a more deprived area, occupation and certain long-term conditions** (e.g. diabetes and obesity) are associated with either a greater risk of developing COVID-19 or a poorer outcome following COVID-19 infection. The impacts of COVID-19 are still emerging and include direct and indirect health impacts due to the virus itself and the impact on health of the responses to COVID including lockdown. While many communities have shown an increase in community spirit and volunteering in many areas, many people have experienced adverse impacts. The impacts include **increased risk of social isolation** and **mental health problems** including anxiety and depression, loss of income and employment affecting ability to buy food and afford essentials – all of which affect health and an increase in unhealthy behaviours for some during lockdown.

What have been the impacts of COVID-19 in your community? What are you hearing from your community members about how COVID-19 has impacted their day to day lives?

Small Area Vulnerability Index (for COVID-19)

The Small Area Vulnerability Index (SAVI)¹ is a measure of COVID-19 vulnerability created by researchers at the University of Liverpool. It investigates the association between each predictor (below) and deaths due to COVID-19 (March to May 2020). **A darker colour (higher score) indicates a greater COVID-19 vulnerability score.**

- proportion of Black, Asian or Minority Ethnic (BAME) groups
- measure of income deprivation
- number of residents over 80 years old
- proportion of care home available beds
- number of residents living in an overcrowded house
- admissions to hospital in the past 5 years for a chronic health condition (cardiovascular disease, respiratory disease, diabetes, kidney disease)

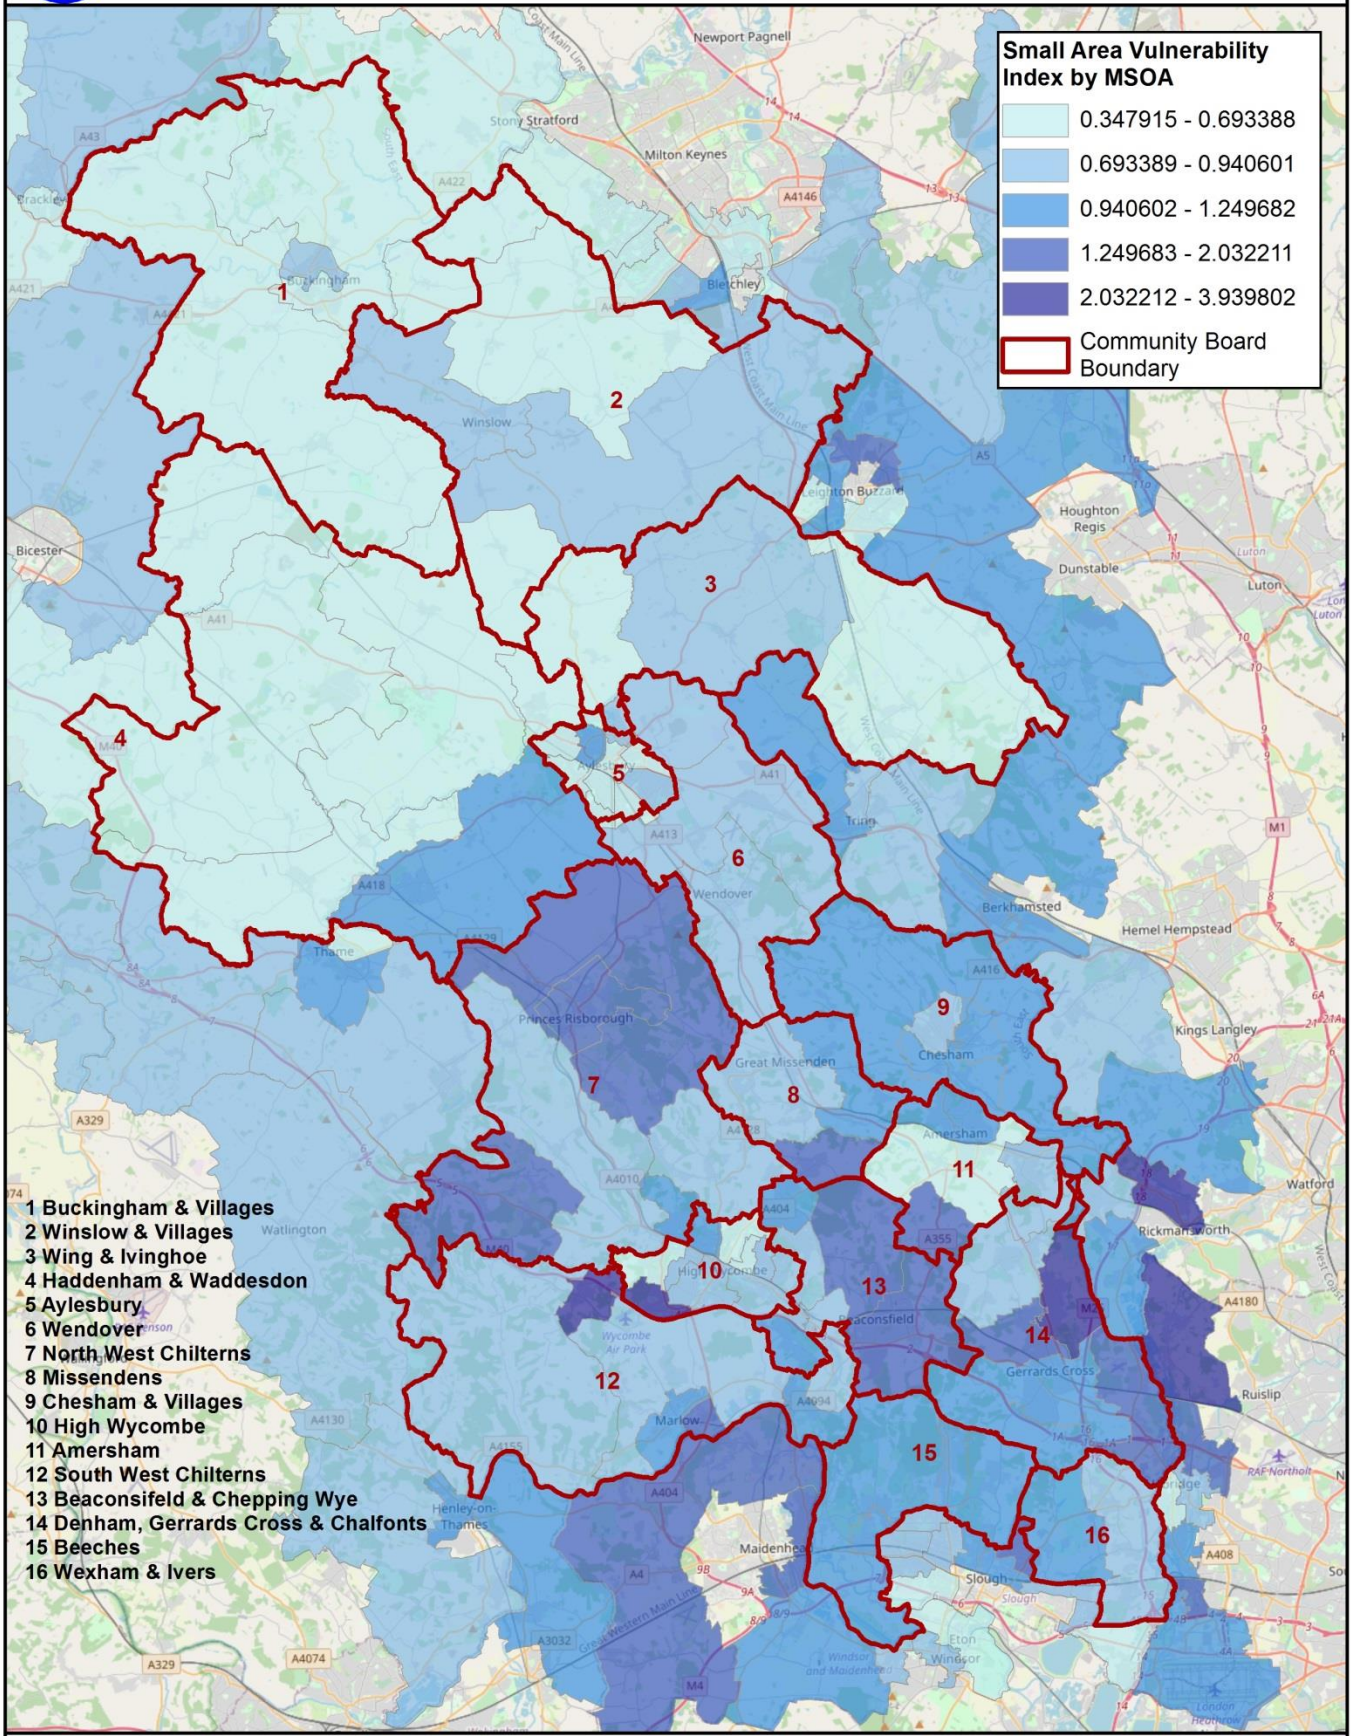

This index provides a measure for each area that indicates the relative increase in risk of death due to COVID-19.

The map for Buckinghamshire below shows higher risk in the South of the county, particularly around areas including Wycombe, Princes Risborough and Beaconsfield.

Community gleaning and harvesting	<p>For people who have less time to put into a regular growing project, community gleaning and harvesting can be a great way to build community connections, spend time outdoors, and make the most of food that is abundant on trees and hedgerows. This can be as simple as a shared community map of fruit trees and hedgerow harvests, but can also include community sessions such as tree pruning, gleaning sessions, apple pressing, chutney- pickle- and jam-making.</p> <p>Some elements of this activity can take place outdoors with social distancing</p>	www.abundancenetwork.org.uk/	Initial funding for website. Start-up costs for equipment such as apple pressing (£500) and pasteurising (£200) equipment, jam pans and thermometers (£100), pruning tools (£100).
Regular community meal	<p>With a committed team of volunteers, a weekly community meal becomes a possibility. This could be for a specific group, for example older people, or for the whole community. Making the most of donated food surplus (e.g. from Fareshare or SOFEA, or using food sharing apps) can be a fun way of raising awareness of food waste and how to reduce it. Regular costs could include kitchen and community centre hire but in some cases this can be waived or covered using a "pay as you feel model". With social distancing, volunteers could instead distribute food parcels or hot meals.</p>	www.foodcycle.org.uk/	Basic costs for posters and flyers, webpage, decor, tablecloths, cooking equipment, crockery and cutlery and glasses £500-£1000. Potentially kitchen and room hire.
Community fridge	<p>The Community Fridge is a simple way of sharing good food that would otherwise go to waste. The model provides communities with a way of providing each other with mutual support without the need for formal intervention. Hubbub has a full set of guidance and it can be signed off by Environmental Health Officers. Anyone can put food in (not high-risk foods) and anyone can take food out. Volunteers</p>	www.hubbub.org.uk/the-community-fridge	£250 for fridge, thermometer, record books. £100-£200 for promotion - flyers, posters, website.

	also tend to collect surplus food weekly from local shops.		
Community larder / food club	With larger quantities of surplus food, often donated by Fareshare, communities can get together to create a club-type membership system. Volunteers get free membership and everyone else pays around £5 a week for £20-worth of good quality surplus food. The larder "pops up" in a community centre once a week for people to collect their items. This is different to a food bank in that people pay a small amount and get to choose which items they want. Some health considerations can be put into place, for example limiting the number of sugary items and allowing plenty of fruit and vegetables	fareshare.org.uk/	£200-£300 for equipment e.g. crates, tables, storage, etc. Room hire if not offered free of charge.
Community shop	A community shop can be a fantastic community hub offering many different services from a low-cost shop and café to a good neighbour scheme or bike repair scheme. Communities who are committed for the long term can create lots of fantastic and great value benefits.	www.sandfordtalkingshop.org/	£5000 to £7000 start-up to draw up community plans and consult on local need - but this could leverage grant funding and local donations or a community share offer.
Physical Activity whole community approaches			
Active Movement community focus	<ul style="list-style-type: none"> - Create an active movement community - Resources for residents to help them to reduce their sedentary behaviour <p>Possible with social distancing</p>	https://www.activemovement.co.uk/active-community	Depends on size of community and materials needed – likely to be around £5000
A non-digital offer for people with reduced	An intervention to encourage people with reduced digital capability to be more active		Phone call – co-ordination of instructors and cost of their time

Ideas for Community Health and Wellbeing Initiatives			
Name of activity	Brief description	Link to more information	Approximate cost to deliver
digital capabilities	<ul style="list-style-type: none"> - A phone call activity session – with local residents and local instructors. Simple, fun activities that can be done over the phone to help get people more active - Distribution of physical packs – ideas of how to be physically active. Could this be made interactive? E.g. sharing your ideas or plans with your local community - Collaboration with local radio stations – can we get 10 for today on one of the local radio stations? https://10today.co.uk/tune-in/ <p>Possible with social distancing</p>		<p>Printing or development of packs for residents (could be done centrally if enough interest)</p> <p>Local radio station – unknown as to how much a 10 minute slot each day would cost</p>
Marked walking routes with instructions for exercises at different points along the way	<ul style="list-style-type: none"> - The marking of accessible routes of varying lengths around the local community with different activities at each point. E.g. 10 star jumps or 10 toe taps at this point - Routes need to be clearly marked, interesting and fun to do and of varying lengths suitable for all abilities - Can team up with Simply Walks volunteer walk leaders to do this - Incorporate local green spaces <p>Possible with social distancing</p>		<p>Depends on the length of the walking route and the type of markers</p>
3, 2, 1 routes	<p>Routes of 3, 2 and 1 miles respectively for either walking/ jogging/ running, clearly signposted and marked for people to follow.</p> <p>For example: 3-2-1 is Run England's project which aims to provide a range of marked out running or jogging routes across the country</p>	<p>https://runtogether.co.uk/about/archive-news/2013/2/22/find-a-marked-running-route-near-you/</p>	<p>Cost of markers to mark out routes and advertise them</p>

Name of activity	Brief description	Link to more information	Approximate cost to deliver
	<p>route with family and friends.</p> <p>Measures could be put in place to make this activity covid secure</p>		
Community Growing	See info in food poverty section		
Cross-generational garden projects working with care homes and older adult assisted living facilities	<ul style="list-style-type: none"> - Develop green space, similar to community gardening - Focus specifically on spaces where there may be socially isolated individuals such as care homes or assisted residential settings - Encourage local families to get involved 	<p>Example of a skip garden</p> <p>https://www.kingscross.co.uk/global-generation</p>	
FANs (Friends and Neighbours) projects	A project to enable residents of care homes to play an active role in developing closer links with their local community to help improve their own health and wellbeing.	https://www.careadvicebuckinghamshire.org/Resources/Councils/Buckinghamshire/gict/FaN-Newsletter.pdf	Dependent on initiative and partner organisation
Green Gym	<p>Green Gyms are fun and free outdoor sessions where you will be guided in practical activities such as planting trees, clearing play areas, sowing meadows and establishing wildlife ponds.</p> <p>Participants take part in a wide range of worthwhile activities, improving strength, flexibility, mental wellbeing and feelings of optimism.</p> <p>This activity can take place outdoors with social distancing</p>	https://www.tcv.org.uk/health/	Low cost, run by volunteers. May need a small contribution for initial set up/ tools etc
Play Streets	A model where neighbours close their street to through traffic for a couple of hours, creating a safe space for children	https://playingout.net/about/what-is-playing-out/	Support with applications for street closures and advertisement

Ideas for Community Health and Wellbeing Initiatives			
Name of activity	Brief description	Link to more information	Approximate cost to deliver
	to play out.		
Simply Walk	<p>Walking is a great way to get out and about and meet new people while improving your health and wellbeing. Simply Walkers are out in all weathers, smiling, talking and enjoying each others company.</p> <p>Our volunteer-led walks run all year, with over 700 walkers who join us on one of over 80 walks across the county every week. Volunteer leaders are there to help you walk at your own pace, so there is no need to worry about being left behind, lost or feeling left out.</p>	https://www.bucksc.gov.uk/services/environment/exploring-the-countryside/simply-walk/	Free but donations required for sustainability and for new routes. Each walk costs around £700 to fund yearly
Sustrans – change your streets	For communities thinking about making changes to their street to solve issues and/or create a better street environment	https://www.sustrans.org.uk/our-blog/get-active/2019/everyday-walking-and-cycling/13-things-you-can-do-with-your-community-to-improve-your-street/	Sustrans managed projects require funding of at least £10,000. Other projects can be less costly depending on what you want to implement
Jogging or running groups e.g. Parkrun	<p>Parkrun organise free, weekly, 5km timed runs around the world. They are open to everyone, free, and are safe and easy to take part in.</p> <p>There are currently six Parkruns in Buckinghamshire:</p> <ol style="list-style-type: none"> 1. Buckingham 2. Aylesbury 3. Wendover 4. Church Mead 5. Wycombe 6. Marlow 	https://www.parkrun.org.uk/	May need some funding for initial start up and running costs

Living Streets	Not only are we exceptional walkers, we're also experts in planning and urban design, positive behaviour change and have a huge number of on the ground projects that are boosting communities across the UK. We offer a range of bespoke consultancy, project management and behaviour change initiatives, as well as products that will help your business or school reap the benefits of increased walking levels.	https://www.livingstreets.org.uk/products-and-services/projects https://www.livingstreets.org.uk/products-and-services	Depends on initiative
Physical activity schools/ early years settings			
Daily Mile	The Daily Mile is a social physical activity, with children running or jogging one mile each day – at their own pace – in the fresh air with friends. Children can occasionally walk to catch their breath, if necessary, but should aim to run or jog for the full 15 minutes.	https://thedailymile.co.uk/	Free
Physical Literacy	Move to Improve is a collaboration between Buckinghamshire County Council and Leap. The Move to Improve resources were developed in response to national guidance and local consultation with teachers. They called for additional resources to support nursery staff and teachers to imbue the teaching of fundamental movement skills within the 3 – 7 year age group.	http://www.movetoimprove.org.uk/	Free
Reducing sedentary behaviour in schools and workplaces	<p>The focus of Active Movement is not on exercise regimens and diet, but establishing a behaviour and mindset that will last every child a lifetime.</p> <p>The Active Movement programme is designed to evolve with the children's own mobility, communication, education and maturity.</p>	https://www.activemovement.co.uk/	£3000 per school setting

	From nursery to secondary school, the programme constantly changes to educate and inspire children to reduce their sedentary behaviour and increase low-level activity as part of the home and school life.		
Satellite Sports Clubs	Satellite clubs provide a link between a community activity provider and an education establishment or youth organisation by creating relevant, appealing and convenient sessions for inactive 11-25 year olds outside the sport club environment	https://www.leapwithus.org.uk/satellite-clubs/	Funding of up to £2k available; but could be match funded by Community Boards to extend the scope of the local project
School Travel Planning	As well as reducing congestion and the number of parents that drive to school, a school travel plan helps to focus on promoting active, safe and sustainable travel.	http://schooltravelplanning.com/ http://schooltravelplanning.com/schools/initiatives/	Varies depending on initiative
Mental Wellbeing			
Bucks Time To Change (TTC) Display Stands for Community Events	Brief description The Bucks TTC Hub is a partnership of local organisations and people who are committed to ending mental health stigma and discrimination. Collectively and independently they initiate and run regular local activities to challenge mental health prejudice, coming together to align and maximise the impact of their combined activity. With the support of the Bucks TTC hub, the national TTC movement has the opportunity to change the way society thinks about those with mental health problems.	Link to more information www.timetochangebucks.org or email the Hub Coordinator via Champions@bucksmind.org.uk	Free
Mental Health	Bucks Mind delivers various educational sessions to adults,	Link to more information	Approximate cost to delivery:

Awareness Sessions	<p>parents, carers, community groups and those working with young people. These sessions include assemblies, workshops and full training days on mental health awareness to normalise conversations about mental health and reduce stigma and discrimination and also to support work with young people. The team creates bespoke training, from a one-hour workshop to a full day's training on topics as follows:</p> <ul style="list-style-type: none"> • Prevalence of mental health difficulties in young people • Mental health and media • How to talk about mental health with young people • Available support for young people • Available support for parents and families 	https://www.bucksmind.org.uk/services/children-and-young-peoples-services/mental-health-education-in-schools/	Usually £100 for an hour's workshop
Wider activities	Many of the other activities included in this document that involve participating in your community, learning new skills and being physically active will also boost mental health.		
Communities			
Street Associations	Creating stronger more connected communities by encouraging residents to look out for their neighbours and raise awareness of scams and hidden issues. An information pack is given to residents with tools and resources to be the eyes and ears on the street. Positive outcomes include referrals to preventative services and reducing isolation through connections with other neighbours/local activities.	https://www.bucksgov.uk/services/community/helping-your-community/street-associations/	
Dementia Friendly communities	A dementia-friendly community is a city, town or village where people with dementia are understood, respected and	https://www.alzheimers.org.uk/get-	Free (there may be a small amount of pump priming for

	<p>supported.</p> <p>The Alzheimer's Society has a recognition scheme which celebrates the work of dementia-friendly communities across the country. Communities can be supported to establish and run a local Dementia Friendly Alliance.</p> <p>Dementia Friends Awareness Sessions can be delivered to local communities and businesses and local champions can be given training to deliver the sessions in their community</p>	<p><u>involved/dementia-friendly-communities/what-dementia-friendly-community</u></p>	<p>meeting expenses, training and any activities the alliance might be interested in – eg the Dementia Bus)</p>
Virtual Dementia Tour Bus	<p>An immersive training experience provided by Training2Care which gives participants a powerful insight into some of the physical and sensory challenges associated with living with dementia. An effective tool for bringing together local partners and potential stakeholders.</p>	<p><u>https://www.training2care.co.uk/virtual-dementia-tour.htm</u></p>	<p>Several events have been funded by Local Area Forums at a cost of approximately £1000 per day (36 participants)</p>
Movers and Shakers	<p>Movers & Shakers is community led health and wellbeing initiative that supports older people to stay fitter longer. Members attend weekly sessions that encourage a healthier lifestyle. A typical session consists of an hour of physical activity, an hour of craft activity, a health/social care related presentation and a healthy lunch in a communal setting.</p>		<p>Small amount of pump priming (£500 - £1000 depending on venue and tutor costs), as groups should be self-sustaining</p>
